

# THE CONTAINER PROJECT PROCESS

THE  
PACKAGED  
INNOVATION  
EXPERTS

[www.gemcontainers.co](http://www.gemcontainers.co)

# GETTING STARTED

We at GEM (Global Equipment & Manufacturing) are excited to assist you in developing your custom container project, and want this process to be as seamless as possible. In these next few pages, we've provided a guideline for our process, and what options you have for your project moving forward.

## CUSTOM BUILT INTEGRATED EQUIPMENT

# PHASE 1

## THE QUOTE

Provision of quotes is an important part of the process, and we're prepared to work with you to meet your needs. Below are three options for getting estimates on your container project.

### **Exploratory Estimate: FREE**

GEM provides a ROM (rough order of magnitude) quote based on the specs you provide.

### **Quotes With Client Provided Schematics: \$750.00**

If you have schematics already completed; this fee is credited to the project.

### **Quotes Without GEM Provided Schematics: \$1,750.00**

If you don't have schematics already completed ; this fee is credited to the project.

# PHASE 2

## PRODUCTION CLASSIFICATION & APPROVAL

It is important to know that **GEM** takes your project with a great deal of interest and concern and will incorporate it into our project schedule as soon as all documentation and deposits are received. Should you require an expedited process, please see the below options:

- **Expedited Level:** takes highest priority in our production schedule
  - Quote Amount + 11%
- **Priority Level:** takes priority in our general production schedule
  - Quote Amount + 7%
- **Quality Level:** will be incorporated in our general production schedule
  - Standard Quote Amount

# PHASE 3 INVOICE

After the production classification has been chosen, and the quote has been signed and approved, there is a 50% deposit due upon presentation of invoice. This will initiate shop drawings, purchase orders and detailed workflow timelines.

**THE GEM  
ADVANTAGE**

# PHASE 4 PRODUCTION

Upon receipt of the approved drawing package, we initiate production of your custom container. Photos and updates will be sent regularly and kept in our digital database for record of the entire process.

## DESIGN & ENGINEERING

## CONTAINER MODIFICATION

## PROCESS DRIVEN DESIGN

# PHASE 5 DELIVERY

After completion of your project, we'll perform final inspections/approvals, and submit a final invoice for payment of the remaining 50%. Once payment has been cleared, we'll release the container for shipment/delivery to its desired location. Please note that shipping is not included in our production quotes, but we can assist in arranging logistics if needed.
